**ANSON HOME LIFT
ENHANCE YOUR LIVING EXPERIENCE**

ANSON ENGINEERING & MACHINERY SDN BHD

About ANSON HOME LIFT

With over 30 years of experience in elevator installation across Malaysia, ANSON HOME LIFT is a trusted name in home mobility solutions. Our company specializes in delivering premium, space-saving home elevators tailored to modern lifestyles.

Backed by a team of skilled professionals and engineers, we are committed to providing safe, reliable, and stylish elevators that elevate the comfort and value of your home. Whether it's a compact lift for a cozy residence or a high-end design for a luxury bungalow, we offer a wide range of customizable models to suit every need.

At ANSON, it's not just about going up and down — it's about upgrading how you live.

Our Promise

At ANSON HOME LIFT, we are more than just an elevator provider — we are your long-term partner in home comfort and safety.

Our commitment to you, every step of the way.

Safety First

Your safety is our top priority. Our lifts are equipped with advanced safety features and undergo strict quality control before every installation.

Whisper-Quiet Operation

Enjoy smooth, silent rides with our hydraulic system designed for quiet performance, ideal for any home environment.

Reliable After-Sales Support

We provide comprehensive maintenance, warranty coverage, and fast response for any technical issue — so you never have to worry.

Fully Customizable Design

From door styles to finishes, our elevators are tailored to fit your home's architecture and your personal style.

Professional Team, Trusted Service

Our expert team brings decades of experience to every project, ensuring flawless installation and customer satisfaction.

INTELLIGENT GUARD ELEGANT LIFE

Villa elevator gives you ideal life beyond imagination. Every tiny design enables you to better enjoy life and experience more elegant and more intelligent modern home life quality.

Our Lift Technology: Hydraulic Pump System

Smooth. Silent. Reliable.

At the heart of every ANSON home lift is our trusted Hydraulic Pump System — engineered for comfort, safety, and seamless vertical travel.

How It Works

Our hydraulic lifts operate using a powerful yet compact pump that pushes oil into a cylinder to raise the lift car, and slowly releases it to lower. This ensures gentle, stable movements with minimal noise.

Why Choose Hydraulic System?

·No Pit Required

Install directly on flat ground — perfect for existing homes or bungalows.

·Whisper-Quiet Operation

No loud motor sounds — ideal for peaceful residential environments.

·Space-Efficient Design

No need for a separate machine room. Equipment can be hidden inside shaft or adjacent cabinet.

·High Load Capacity

Can carry up to 400kg (4-6 persons) comfortably across 2-5 floors.

·Safe and Stable

Equipped with emergency lowering, pressure relief, and backup systems.

Designed for homes. Built to last.

Hydraulic lifts offer the perfect balance of performance and practicality — making them the No.1 choice for residential users.

Traction villa elevator

- ◎ No need for traditional computer room: saving construction cost
- ◎ Backpack frame and gantry frame elevator structures can be adopted according to the door opening requirements of the house structure
- ◎ VVVF drive technology: it is controlled by special microcomputer board for household elevator, which is stable and comfortable
- ◎ Special traction machine frame: fixed on the guide rail, the building can not bear the force
- ◎ Host: 220V single-phase power supply can be used. For ordinary household electricity, there is no need to apply for industrial power supply
- ◎ Automatic special gantry crane: frequency conversion, energy saving, safe and reliable
- ◎ UPS (Standby power supply) can release people in emergency when the motor is stopped
- ◎ The total rated power during operation is 1.5KW (including 1.1KW of drive system)

Permanent magnet synchronous traction host, small and light

Double supporting structure of traction wheel makes the operation more stable. Ideal choice for villa ladder, energy saving, environmental protection, low noise and high cost performance

Key Benefits of Anson Home Lift

Why Choose Anson Home Lift?

We go beyond just moving between floors. Our lifts are designed to bring comfort, style, and safety into your home.

No Pit. No Machine Room.

Our hydraulic lifts require no deep pit excavation and no separate machine room, making them ideal for both new homes and retrofit projects. This not only reduces construction costs but also protects your home's original structure.

Whisper-Quiet Operation

The hydraulic pump system is designed for low-noise performance, making every ride smooth and nearly silent.

Maximum Safety

Each lift is equipped with multiple safety features:

- Emergency lowering system (in case of power failure)
- Anti-fall valve to prevent sudden drops
- Overload and pressure relief system
- Battery backup

Quick & Professional Installation

With over 30 years of experience, our team can complete most home installations within a few working days. We handle the full process — from site inspection, layout planning, to clean and precise installation — so you can enjoy your lift sooner, with no stress.

ANSON lifts are not just functional — they are a statement of comfort, style, and safety in your home.

Auto Single Opening Door (A-101)

Our Auto Single Opening Door model offers a perfect balance of functionality and minimalist design. It features a one-way automatic door that opens sideways with elegance and ease — making it ideal for compact homes, side wall installations, or interior spaces that require a clean and modern appearance.

Auto Center Swing Door (A-303)

The Auto Swing Door – Center Opening model features a dual-panel design where two glass doors open smoothly to both sides. This style offers a wider, more welcoming entry and adds a touch of luxury to any residential setting.

It's the ideal choice for homeowners who want their lift to stand out — both in functionality and aesthetic appeal.

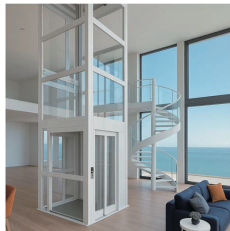

Auto Center Sliding Door (A-808)

The Auto Center Opening Door model features two glass panels that open automatically and simultaneously from the center — sliding left and right to create a wide, elegant entrance. Built for both luxury and convenience, this model creates a balanced, spacious entryway while maintaining a minimalist and architectural look.

It's the ideal lift style for modern homes, luxury duplexes, and design-forward interiors.

Auto Single Sliding Door (A-909)

The Auto Swing Door – Center Opening model features a dual-panel design where two glass doors open smoothly to both sides. This style offers a wider, more welcoming entry and adds a touch of luxury to any residential setting.

It's the ideal choice for homeowners who want their lift to stand out — both in functionality and aesthetic appeal.

Lift With Shaft

A fully self-contained lift system featuring a stylish glass shaft — offering a modern, transparent look that blends seamlessly with any home. Ideal for spaces without a lift core, it ensures quick installation with minimal structural work.

Lift Without Shaft

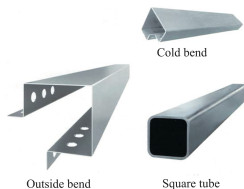

A compact lift system designed to be installed within a pre-built concrete or brick shaft. Ideal for homeowners who already have a lift space, it offers full flexibility in interior finishes while keeping the external structure minimal.

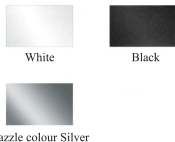

Steel structure hoistway

The cost performance is high. The outsourcing board is encapsulated by the decoration unit in the later stage, which is consistent with the design style. The installation position is optional. The surface is sprayed with antirust treatment and corrosion resistance.

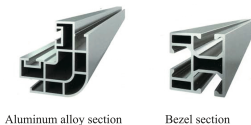

Advanced sprayed steel structure frame

Aluminum alloy hoistway

Independent frame glass design, no additional construction cost, good light transmittance, integrated with interior decoration; The installation position can be selected by yourself, with corrosion resistance and long service life. Industrial grade aluminum alloy is selected, and the glass is safety tempered glass.

Advanced sprayed aluminum alloy frame
